the European Union

Welcome to the Green Project, an initiative co-financed by the European Union through the Erasmus+ program, aimed at promoting green, social, and digital entrepreneurship among young people. In this endeavor, six partners from Spain, Argentina, Uruguay, and Paraguay have come together to provide an innovative and powerful tool: our Toolkit.

The Green Toolkit is more than just a resource; it's a gateway to a world of possibilities for those looking to make a difference in the business and social landscape. It consists of various elements designed to inspire, support, and empower entrepreneurs in building a more sustainable future.

In our Toolkit, you will find a collection of best practices, an interactive glossary to clarify key concepts, and twelve engaging podcasts that immerse you in each theoretical module, complemented by inspiring interviews with six standout enterprises in this field.

Additionally, we've created a virtual classroom where you can delve deeper into the content of the six theoretical modules and test your knowledge through a virtual game designed for each topic. The goal? To earn a certificate that validates your skills and knowledge in green, social, and digital entrepreneurship.

All of this is just a click away on our website, where you can explore each section interactively, access downloadable resources, and navigate through hyperlinks that will take you directly to the information you need.

Get ready to embark on a transformative experience. The green and sustainable future you want to build is closer than you think, and the Green Toolkit will guide you every step of the way!
